PROFESSIONAL PROFILE

Engineering student specializing in Data Science & AI, with strong foundations in Big Data, Cloud, and Full-Stack development. Experienced in designing NLP/LLM pipelines, semantic analysis, and intelligent workflow automation.

KEY SKILLS

- **AI & ML:** Deep Learning, NLP, LLM, RAG, Computer Vision, Python, TensorFlow, Scikit-learn, OpenCV.
- **Cloud & DevOps:** Microsoft Azure, Docker, Kubernetes, Hadoop (HDFS, MapReduce).
- **Development:** Spring Boot 3, React, Node.js, Kotlin, RESTful APIs, SQL, Java, Bash Scripting.
- **Tools:** n8n, Microsoft Intune, Microsoft Defender, Git.

EDUCATION

- **Engineering Degree in Data Science & AI** Taroudant, Morocco
ENSIASD 2024 – Present
- **Bachelor's Degree in Computer Engineering** Casablanca, Morocco
Hassan II University June 2024

PROFESSIONAL EXPERIENCE

- **AI Engineer Intern** June 2026 – August 2026
Leyton · Internship Casablanca
 - Designed and developed an AI-powered SOC Copilot leveraging Retrieval-Augmented Generation (RAG) and multi-agent orchestration to assist cybersecurity analysts in incident investigation.
 - Integrated security data from Wazuh with a semantic retrieval pipeline using vector embeddings, enabling contextual analysis of alerts and MITRE ATT&CK knowledge.
 - Implemented backend services with FastAPI and orchestrated specialized AI agents using LangGraph to automate alert enrichment, threat intelligence analysis, and security report generation.
 - Containerized the application with Docker to ensure reproducible deployment and facilitate collaboration across the development team.
- **R&D AI Engineer** June 2026 – August 2026
Güft · Internship Casablanca
 - Designed a hybrid AI architecture for advanced semantic analysis and automated knowledge extraction from complex document corpora (extraction accuracy > 92%).
 - Built a RAG pipeline combining LLMs and linguistic knowledge base management, reducing document retrieval time by 60%.
 - Integrated an automated response quality evaluation module achieving a semantic coherence score of 0.87 on internal datasets.
- **Systems & Network Administrator** March 2024 – June 2024
CBI · Internship Casablanca
 - Deployed and managed +50 users and virtual devices via **Microsoft Intune**; reduced malware incidents by ~25% using **Microsoft Defender**.
 - Administered **Windows Server** infrastructure in a virtualized environment (80% uptime) and configured +10 VMs on **Microsoft Azure**.

PROJECTS

- **Biometric Protection & AI Model Robustness** | Python, TensorFlow, OpenCV
 - Developed a visual anomaly detection model against biometric spoofing attacks, achieving 98% accuracy on test datasets.
- **Virtual Store — Mobile E-Commerce & Augmented Reality** | Kotlin, ARCore, MVVM, Room
 - Android application for real-environment 3D product visualization (ARCore), with local data persistence via **Room** (SQLite) and **MVVM** architecture.
- **Intelligent Email Assistant** | n8n, AI, End-to-End Encryption
 - Automated n8n workflow for intelligent classification of incoming professional emails (94% accuracy) with end-to-end encryption ensuring message integrity.
- **Facial Recognition Attendance System** | Java, OpenCV, Docker
 - Real-time automated student attendance management via facial recognition, reducing check-in time by 80%; containerized deployment with Docker.

LANGUAGES

Arabic: Native **French:** Professional proficiency **English:** Professional proficiency
